

supervisor_logfile

Synopsis

`supervisor_logfile = path`

Path is used to specify the single log file for the supervisor's internal operations. This is not the same as [supervisor_logpath](#) which determines the location of the job logs.

Example

`supervisor_logfile = /var/log/supelog`

Defaults

- Linux & OS X: `/var/log/supelog`
- Windows XP / Windows Server 2003: `C:\Program Files\pfx\qube\logs\supelog`
- Windows 2008 / Vista / Windows7 / Windows 8: `C:\ProgramData\pfx\qube\logs\supelog`
