

Start Here

This section is intended to help you quickly install and become familiar with Qube! If that's your goal, then head for the [Installing Qube!](#) and follow the instructions.

If you are already using Qube! and want a deeper understanding of how it works, or how to use it more fully, then you will want to look through the [Advanced User's Guide](#).

If you are managing other people's jobs, or just want to become a power user of Qube!, then the [Advanced User's Guide](#) is for you.

Finally, admins who need to install or upgrade Qube! should read the [Administrator's Guide](#).
