Parameters Specific to Clarisse

▼ [Click here for details...](#)

Clarisse Paths

Executable

Explicit path to the Clarisse CNode executable.

Render File

Browse or enter manually the location of the scene file to be rendered. This is a required field for submission.

Important: Best practice is to ensure the scene file and all of its dependent files such as textures are on network storage accessible by the workers.

Output File Path

Specify the Directory for output.

Image Prefix

Specify the padding on frame number with #.

Image/Layer

Clarisse Image or layer to be rendered.

Format

Specify the image format from the dropdown.

Clarisse Options

Threads

Specify the number of threads used by CNODE.
Set 0 to use all available threads.
